

Samsung NP-130-JA01US Battery Replacement

Replace the battery to give new life to your laptop. A new battery will allow you to operate your device for a longer time without having to charge it.

Written By: Jason Schnebelen

INTRODUCTION

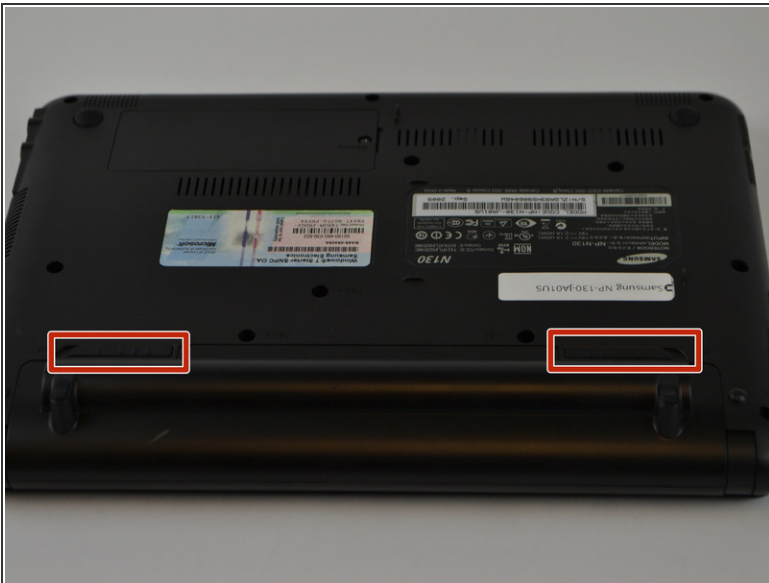

Replacing a dying battery will increase the amount of time the netbook can be powered on without being plugged in. A dead battery will also cause the computer to not power on when it is not plugged in.

Step 1 — Battery

- Turn off the computer.
- Disconnect the charger cable from the computer.
- ⚠ Failure to disconnect the charger cable from the computer could result in an electric shock.
- Flip the computer over so the underside is facing up.

Step 2

- Slide the left and right slider buttons fully away from each other.

Step 3

- Pull the battery out of the computer.

To reassemble your device, follow these instructions in reverse order.
